

Your Best Choice Technology Partner

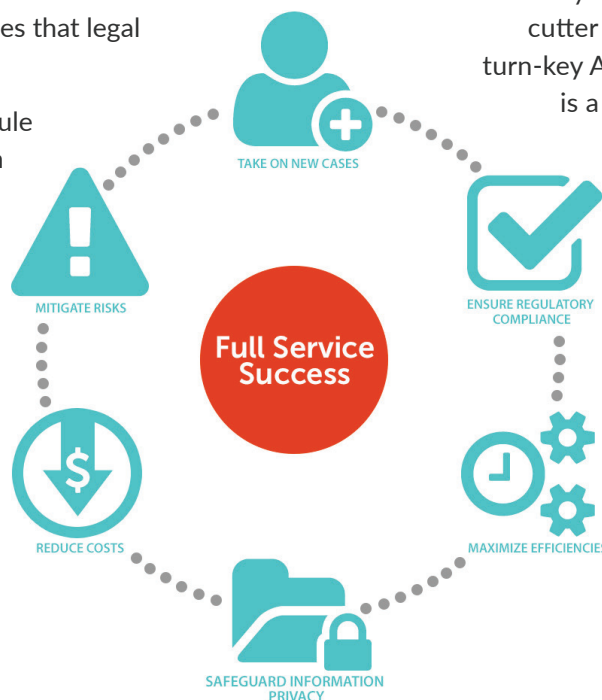

Abacus Data Systems, Inc. enables the **success** of legal professionals and **secures** their future by providing Full-Service, **Turn-Key, Legal Technology Solutions** specifically designed to **increase revenue, reduce costs and maximize efficiencies.**

The Challenge

With over 30 years of service and more than 250,000 clients worldwide, we've seen firsthand the ever-changing challenges and opportunities that legal professionals face.

In today's digital age, and per ABA Rule 1.1, Legal Technology is no longer an option, but rather a matter of professional competency.

We hear from legal professionals every day that the burden of finding, implementing and managing technology takes a bulk of their billable time, in addition to being stressful and confusing. It also takes much more than a software application to run and grow a successful Law Firm.

The Abacus Solution

We recognize that every law firm does things a little differently. To this end, instead of offering cookie-cutter technology products and services, the turn-key Abacus Products and Services Portfolio is a comprehensive suite of fully managed solutions that caters to specific firm needs and budgetary requirements.

The Abacus Portfolio is specifically designed to enable small, medium and large sized firms in all practice areas and jurisdictions to quickly scale up their practice, increase the number of cases they can handle and consistently deliver 'Best Possible Outcomes' for their clients.

The Benefit

APC services range from technology readiness assessments to the design, deployment, implementation and management of In-Office or Virtual Law Practice Environments, to complementary back-office support, such as IT, Bookkeeping and Billing Services.
